**Policy**

Nevada Medicaid and Nevada Check Up reimburse Physicians, Advanced Practice Registered Nurses (APRNs) and Physician’s Assistants (PAs) for covered services that are reasonable and medically necessary and within the provider’s scope of practice as defined by state law.

Please see the [Medicaid Services Manual (MSM) Chapter 600 (Physician Services)](http://dhcfp.nv.gov) for complete policy, coverage and limitations.

See [MSM Chapter 1200 (Prescribed Drugs)](http://dhcfp.nv.gov) for immunization/vaccine information.

See [MSM Chapter 1500 Healthy Kids Program (EPSDT)](http://dhcfp.nv.gov).

**Rates**

Rates information is on the DHCFP website at [http://dhcfp.nv.gov](http://dhcfp.nv.gov) (select “Rates” from the “Resources” menu). Rates are available on the Provider Web Portal at [www.medicaid.nv.gov](http://www.medicaid.nv.gov) through the Search Fee Schedule function, which can be accessed on the Electronic Verification System Provider Login (EVS) webpage under Resources (you do not need to login). Any provider-specific rates will not be shown in the Search Fee Schedule function.

**Prior authorization (PA)**

PA requirements for provider types 20, 24 and 77 are provided in MSM Chapter 600, Section 603.2, titled “Physician Office Services.” Providers may also use the Authorization Criteria search function in the Provider Web Portal at [www.medicaid.nv.gov](http://www.medicaid.nv.gov) to verify which services require authorization. Authorization Criteria can be accessed on the Provider Login (EVS) webpage under Resources (you do not need to login).

**Non-covered services**

Medicaid does not reimburse attending/admitting physicians for services rendered to a recipient when the prior authorization request for hospital admission was denied.

Claims that reimburse in error are subject to recoupment.

**Covered services**

Medicaid covered benefits include but are not limited to office visits, consultations, surgery, routine obstetrical care, some laboratory services, dressing changes, diagnostic testing and other services as discussed in this document.

**Physician-administered drugs**

Nevada Medicaid requires a National Drug Code (NDC) and an NDC quantity for each claim line with a physician-administered drug. For billing specifications, see the Nevada Medicaid [NDC Billing Reference](http://dhcfp.nv.gov) (select “NDC” from the “Providers” menu, then click “Billing Reference”).

**Vaccines**

Nevada Medicaid and Nevada Check Up do not reimburse providers for Vaccines for Children (VFC) vaccines. Providers are encouraged to enroll with the [VFC program](http://dhcfp.nv.gov), which provides free vaccines for eligible children.
Physician, M.D. and Osteopath, D.O., Advanced Practice Registered Nurses (APRN) and Physician’s Assistant (PA)

To enroll as a VFC provider, visit the Nevada Division of Public and Behavioral Health (DPBH) website. Bill administration codes at the usual and customary charge, and bill vaccines at a zero dollar amount. See the Centers for Disease Control and Prevention (CDC) website for more information on the VFC program.

For claims beginning with date of service July 1, 2015, providers who service regular Medicaid and Nevada Check Up recipients may continue to bill for the vaccine administration using the most appropriate CPT code. All vaccine serum will now require National Drug Codes (NDCs) for Nevada Medicaid or Nevada Check Up. Providers must continue to use a zero rate for reimbursement for VFC vaccines, or the SL modifier. Even with a zero rate on the claim, quantity must be included on the claim or the claim will deny.

Vaccine claims are billed with the NDC and are limited to one vaccine per claim line and one unit of measure per individual product.

Bill non-VFC vaccinations with the NDC and the usual and customary rate.

Recognizing the difference between Nevada Check Up and regular Medicaid in the Electronic Verification System (EVS): The type of eligibility will not affect the new way of billing for vaccines, as both Nevada Check Up and regular Medicaid will be billed the same way. For information purposes, in the EVS, regular Medicaid is recognized with a Roman numeral XIX (19) and Nevada Check Up is recognized with a Roman numeral XXI (21).

HPV vaccine uses and restrictions

The following uses and restrictions for Human Papilloma Virus (HPV) vaccines Gardasil® and Cervarix® are in effect.

- Gardasil vaccine, formerly for females only, may be used for boys and young men age 9-26. Please note that for recipients age 9-18, Gardasil is reimbursed through the VFC Program.
- Cervarix vaccine is an FDA-approved HPV vaccine for females only age 9-26. For recipients age 9-18, Cervarix is reimbursed through the VFC Program.
- The three-dose HPV vaccine schedule for recipients over age 18 must begin and end before the recipient turns age 27. Medicaid cannot reimburse for any dose(s) given after the recipient turns 27 years of age, because the vaccine is not approved by the FDA for recipients over the age of 26.

For additional HPV guidelines and information, please see Medicaid Services Manual (MSM) Chapter 1200 or the Centers for Disease Control and Prevention (CDC) website.

Anesthesia

For instructions on billing anesthesia services (including obstetrical deliveries and Botulinum toxin Type A), go to www.medicaid.nv.gov and select “Billing Information” under the “Providers” menu, then click “Anesthesia” under the “Billing Instructions (by Service Type)” heading.

Annual Gynecological Exams

Providers may bill the following HCPCS codes for the annual gynecological exam for women age 21 and older:

- G0101 (Cervical or vaginal cancer screening; pelvic and clinical breast examination)
- Q0091 (Screening Papanicolaou smear; obtaining, preparing and conveyance of cervical or vaginal smear to laboratory)
**Bariatric surgery for morbid obesity**

Bariatric surgery policy for morbid obesity is discussed in MSM Chapter 600, Attachment A, Policy #6-07. Covered CPT codes are 43644, 43645, 43770-43775, 43842, 43845, 43846, 43860, 43865 and 43886-43888.

**Botulinum toxin type A and type B**

Medicaid covers Botulinum toxin Type A (onabotulinumtoxinA, abobotulinumtoxinA and incobotulinumtoxinA) and Type B (RimabotulinumtoxinB – MyoBloc).

Medicaid covers the following codes when electromyography (EMG) guidance is used: 95860, 95861, 95867–95868, 95869, 95870, 95873 and 95874. Bill only one EMG per injection site.

Follow CPT guidelines for chemodenervation, including the appropriate National Drug Code (NDC) for agents used.

**Dermatology services**

For some dermatology services, the CPT descriptors contain language, such as *additional lesion*, to indicate that multiple surgical procedures have been performed. The multiple procedures rules do not apply because the Relative Value Units (RVUs) for these codes have been adjusted to reflect the multiple nature of the procedure. These services are paid according to the unit.

If dermatologic procedures are billed with other procedures, the multiple surgery rules apply.

The following dermatology CPT codes do not require a PA when billed by any provider type:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Developmental testing**

Developmental testing (CPT code 96111) is covered and requires a PA.
**Diabetic outpatient self-management training**

Diabetic outpatient self-management training policy, including prior authorization requirements, is discussed in MSM Chapter 600, Attachment A, Policy #6-10.

Medicaid covers up to 10 hours of initial training. Repeat or additional training is covered only when a PA has been obtained. Use procedure code G0108 to bill for individual training (1 unit = 30 minutes) and G0109 to bill for group training (2 or more recipients, 1 unit = 30 minutes).

**Endoscopic payment methodology**

In situations when two series of endoscopies are performed, the special endoscopy rules are applied to each series, followed by the multiple surgery rules of 100%, 50%, etc. In the case of two unrelated endoscopic procedures, the usual multiple surgery rules apply.

When two related endoscopies and a third unrelated endoscopy are performed in the same operative session, the special endoscopic rules apply only to the related endoscopies. To determine payment for the unrelated endoscopy, the multiple surgery rules are applied. The total payment for the related endoscopies is considered one service and the unrelated endoscopy is considered another service.

**Essure Contraceptive System**

The Essure Contraceptive System must be billed using CPT code 58565 for the procedure. The supply must be billed using HCPCS code A4264, which has been assigned a dollar rate.

CPT code 58565 does not require a PA. HCPCS code A4264 does not require PA. PA is required for the supply for dates of service on or before December 31, 2010, and the PA must have included the manufacturer’s invoice.

The Sterilization Request Consent Form (FA-56) must accompany the claim for the procedure. Do not send the manufacturer’s invoice with the claim.

**Gender Reassignment Surgical Services**

- Genital reconstruction surgery (GRS) services are a Medicaid covered benefit for PTs 20, 24 and 77. All GRS services require a PA, and the recipient must be age 18 or older, and have diagnosis of gender dysphoria. For additional GRS guidelines and information, please see MSM Chapter 600, Section 607.
- Covered diagnosis codes for gender identity disorders (gender dysphoria) include: F64.1, F64.2, F64.8, F64.9.
Gene Analysis Testing

Use code Z80.42 when performing BRCA1/BRCA2 gene analysis testing for female recipients who have a family history of prostate cancer. Claims that contain ICD-10 diagnosis code Z80.42 (Family history of malignant neoplasm of prostate) will not deny with a gender edit when the recipient is identified as a female. Please refer to the PT 43 Billing Guide for additional information on billing and claims.

Hyalgan and Synvisc® injections

Hyalgan and Synvisc® injection policy is discussed in MSM Chapter 600, Attachment A, Policy #6-08.

Covered diagnosis codes are M15.9, M17.10, M17.5, M17.9, M19.90, M19.91, M19.93.

Bill CPT code 20610 for this service. Submit the entire injection series on the same claim.

Hyperbaric oxygen therapy (HBOT)

HBOT policy is discussed in MSM Chapter 600, Attachment A, Policy #6-03.

Bill CPT code 99183 for this service.

Covered diagnosis codes for other than acute conditions are: A42.0, A42.1, A42.2, A42.81, A42.82, A42.89, A43.8, B47.9, I74.2, I74.3, I74.5, L08.1, L97.509, M27.8, M72.6, M86.60, M86.619, M86.629, M86.639, M86.642, M86.659, M86.669, M86.679, M86.68, M86.69, S47.9XXA, S57.00XA, S57.80XA, S67.20XA, S67.30XA, S77.00XA, S77.10XA, S77.20XA, S87.00XA, S87.80XA, S97.00XA, S97.80XA, S97.109A, T66.XXXA, T86.820, T86.821.

Covered diagnosis codes for acute conditions are: T53.91XA, T55.0X1A, T55.0X2A, T55.0X3A, T55.0X4A, T55.1X1A, T55.1X2A, T55.1X3A, T55.1X4A, T57.3X1A, T57.3X2A, T57.3X3A, T57.3X4A, T57.8X1A, T57.8X2A, T57.8X3A, T57.91XA, T57.92XA, T57.93XA, T57.94XA, T58.01XA, T58.02XA, T58.03XA, T58.04XA, T58.11XA, T58.12XA, T58.13XA, T58.14XA, T58.2X1A, T58.2X2A, T58.2X3A, T58.2X4A.
Intrathecal Baclofen Therapy (ITB)

Intrathecal Baclofen Therapy (ITB) policy is discussed in MSM Chapter 600, Attachment A, Policy #6-04.

Covered diagnosis codes for ITB are G35, G80.9, I67.89, R25.0, R25.1, R25.2, R25.3, R25.9, S06.0X0A, S14.109A, S24.109A, S34.109A, S34.139A.

Covered CPT codes are 99211-99215, 99355-99356, 62350, 62351, 62355, 62365, 62367, 62368 and 96530.

Medical Nutrition Therapy

Medical Nutrition Therapy services are reimbursable under PT 15 (Registered Dietitian). Please refer to the PT 15 Billing Guide for medical nutrition therapy information.
Podiatry
Podiatry services are reimbursable under PT 21. Please refer to the PT 21 Billing Guide for podiatry information.

Presumptive and Definitive Drug Screening and Testing
For presumptive and definitive drug screening and testing information, refer to the Provider Type 43 Billing Guide.

Preventive Screenings
Preventive Services for men, women, and children are covered as recommended by the U.S. Preventive Task Force (USPSTF) A & B recommendations. No PA is required for these services.

Radiology codes payable for PTs 24 and 77
Effective on claims with dates of service on or after January 1, 2016, provider types 24 (Advanced Practice Registered Nurses) and 77 (Physician’s Assistant) are reimbursed for radiology codes (70000-79999).

Routine Office Visits
Routine office visits must be billed with the appropriate level of Evaluation and Management (E&M) CPT codes. System reviews (i.e. eyes, cardiovascular, respiratory, skin, constitutional) are included in an office visit. System reviews may be billed separately only when a separate, identifiable need is present and must be reflected in the patient file).

Tobacco Cessation Counseling for Pregnant Women
CPT codes 99406 and 99407 are used to bill tobacco cessation counseling for pregnant women only. For all other recipients, these services are billed using the appropriate Evaluation and Management (E&M) office visit code.

Vagus Nerve Stimulator (VNS)
Vagus Nerve Stimulator (VNS) policy is discussed in MSM Chapter 600, Attachment A, Policy #6-06.
A 90-day global period applies to implantation.
Covered diagnosis codes for VNS are G40.111, G40.119, G40.211, G40.219, G40.911, G40.919.
Covered CPT codes are 99211-99215, 99355-99356, 62350, 62351, 62355, 62365, 62367, 62368 and 96530.

Wound Care
Wound management policy is discussed in MSM Chapter 600, Attachment A, Policy #6-02.
Bill the appropriate E/M and CPT code(s) for the management of both wound and burn care (e.g., 16000-16036, 97602 and 97110).
**Fetal Ultrasound Codes**

The following table offers a guideline for fetal ultrasound CPT codes:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Gestation</th>
<th>Approved Indications</th>
</tr>
</thead>
<tbody>
<tr>
<td>76801</td>
<td>Fetal/maternal eval</td>
<td>&lt;14 weeks</td>
<td>• Once per pregnancy</td>
</tr>
<tr>
<td>76805</td>
<td>Fetal and maternal eval after first trimester</td>
<td>&gt;14 weeks</td>
<td>• Payable one time only, per practice                                                        • To screen for congenital malformation                                      • To exclude multiple pregnancy                                              • To verify dates and growth                                                                 • To identify placental position                                                             • Non-payable if 76811 has been utilized, unless a significant 2nd diagnosis</td>
</tr>
<tr>
<td>76811</td>
<td>Fetal and maternal eval w/detailed fetal anatomic exam</td>
<td>14-26 weeks</td>
<td>• Payable one time only, per practice                                                        • To screen for congenital malformation                                      • To exclude multiple pregnancy                                              • To verify dates and growth                                                                 • To identify placental position</td>
</tr>
<tr>
<td>76813</td>
<td>Fetal nuchal translucency measurement</td>
<td>&lt; 14 weeks</td>
<td>One time only with calculation of risk based on:                                                • Maternal age                                                             • Human chorionic gonadotropin                                                  • Pregnancy-associated plasma protein A</td>
</tr>
<tr>
<td>76815</td>
<td>Limited (fetal heart beat, placental location, fetal position and/or qualitative amniotic fluid volume, one or more fetuses)</td>
<td>26+ weeks</td>
<td>• To answer specific questions required                                                        • Investigation                                                            • In an emergency to verify cardiac activity                                      • To verify fetal presentation during labor                                          • Generally not appropriate if a prior complete exam is not on record</td>
</tr>
<tr>
<td>76816</td>
<td>Follow up to eval fetal size, amniotic fluid volume or re-eval of organ system</td>
<td>26+ weeks</td>
<td>• Follow up fetal size, assess for growth                                                        • Re-evaluation of organ system                                                • Verify placental position                                                      • Records must clearly state what the previous growth was. Follow up ultrasound to evaluate growth is not payable if the growth was noted to be within normal limits on the initial ultrasound, unless there is a medical reason to suspect aberrant growth (e.g. chronic hypertension, diabetes, maternal obesity, multifetal gestation, prior macrosomic fetus)</td>
</tr>
</tbody>
</table>
### Provider Types 20, 24 and 77 Billing Guide

**Physician, M.D. and Osteopath, D.O., Advanced Practice Registered Nurses (APRN) and Physician’s Assistant (PA)**

<table>
<thead>
<tr>

</tr>
<tr>
<td>76820</td>
<td>Doppler velocimetry, fetal; umbilical artery</td>
<td></td>
<td>• Allowed only in cases with documented as asymmetrical IUGR&lt;br&gt;• Oligohydramnios&lt;br&gt;• Discordant twins</td>
</tr>
<tr>
<td>76821</td>
<td>Doppler velocimetry, fetal; middle cerebral artery</td>
<td></td>
<td>• To determine fetus at risk for anemia (e.g., red blood cell iso-immunization, parvovirus infection)&lt;br&gt;• Poor fetal growth affecting management of mother</td>
</tr>
<tr>
<td>76825</td>
<td>Echocardiography Fetal</td>
<td></td>
<td>Once per pregnancy for:&lt;br&gt;• A potential defect noted in the original ultrasound (76805 or 76811)&lt;br&gt;• A high risk of a potential heart defect (congenital history parent or sibling, abnormal screen)&lt;br&gt;• Extra cardiac abnormality&lt;br&gt;• Increased risk of chromosomal abnormality&lt;br&gt;• Fetal cardiac arrhythmia&lt;br&gt;• Non-immune hydrops&lt;br&gt;• Question of cardiac anomaly on prior sonogram&lt;br&gt;• IUGR&lt;br&gt;• Teratogenic exposure (alcohol, amphetamines, anticonvulsives, lithium)&lt;br&gt;• Maternal disorders (diabetes, collagen vascular disease, PKU, rubella, inherited familial syndromes)</td>
</tr>
<tr>
<td>76826</td>
<td>Follow up study; fetal echocardiography</td>
<td></td>
<td>Once per pregnancy if:&lt;br&gt;• 76825 is abnormal earlier in the pregnancy and the F/U up scan will alter or affect the treatment plan</td>
</tr>
</tbody>
</table>
### Provider Types 20, 24 and 77 Billing Guide

**Physician, M.D. and Osteopath, D.O., Advanced Practice Registered Nurses (APRN) and Physician’s Assistant (PA)**

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Procedure Description</th>
<th>Justification</th>
</tr>
</thead>
</table>
| 76827          | Doppler echocardiography, fetal, pulsed wave and/or continuous wave with spectral display complete | Once per pregnancy:  
  - Where a potential defect was noted in the original ultrasound (76805 or 76811)  
  - When there is high risk of a potential heart defect (congenital history, abnormal screen)  
  - **Requires Prior Authorization** |
| 76828          | Follow up or repeat study of Doppler echocardiography, fetal | Once per pregnancy if:  
  - 76827 was abnormal earlier in the pregnancy and the follow up study will alter the treatment plan  
  - **Requires Prior Authorization** |
| 93325          | Color flow mapping |  
  - If echocardiography is questionable or ambiguous  
  - If diagnosis depends on hemodynamic evaluation of intracardiac circulation which can only be obtained by Doppler  
  - When the diagnosis rests on measuring the fetal cardiac output  
  - To more precisely define a complicated diagnosis  
  - Add-on code and must be used in conjunction with 76825, 76826, 76827 or 76828 |

### Telehealth Services

Providers must follow guidelines set forth in MSM Chapter 3400 (Telehealth Services). A licensed professional operating within the scope of their practice under state law may provide the following Telehealth services for Medicaid recipients:

- annual wellness visits;
- diabetic outpatient self-management;
- documented psychiatric treatment in crisis intervention (e.g., threatened suicide); and
- office or other outpatient visits.

**Originating site:** Use procedure code Q3014.

**Distant site:** Use the appropriate procedure code for the service provided with the GT modifier.

### Healthy Kids (EPSDT)

The following EPSDT instructions do not apply to Indian Health Services (IHS) providers.

### Policy

The Early and Periodic Screening, Diagnostic and Treatment (EPSDT) Program provides coverage for diagnostic and preventive services. It evaluates the physical and mental health, growth, development and nutritional status of infants, children and adolescents. In Nevada, the EPSDT Program is known as “Healthy Kids.”

Refer to MSM Chapter 1500 online at [http://dhcfp.nv.gov](http://dhcfp.nv.gov) for additional program information and for the
periodicity and immunization schedules.

See MSM Chapter 1200 for additional immunization/vaccine information.

Providers can access the EPSDT screening forms from the Division of Health Care Financing and Policy (DHCFP) EPSDT webpage at [http://dhcfp.nv.gov/Pgms/CPT/EPSDT/](http://dhcfp.nv.gov/Pgms/CPT/EPSDT/).

**Covered services**

A Healthy Kids exam is covered regardless of whether it falls within the recommended periodicity schedule. Ongoing treatment identified or referred from a Healthy Kids exam may require a PA.

**Vaccines, certain laboratory tests and family planning services** are covered benefits. Family planning information should be offered during a Healthy Kids exam as appropriate and requested. Bill these services on a separate claim line than the exam.

Use CPT codes 90460 and 90461 to bill for vaccine administration for recipients age 0 through 18.

**Developmental screenings** are a covered benefit and may be billed separate from the Healthy Kids exam. See MSM Chapter 1500, Section 1503.2 for requirements.

Medicaid also provides coverage for scheduled, **non-emergency transportation** to and from a Healthy Kids exam. Please contact Medical Transportation Management (MTM) directly at (844) 879-7341 to arrange for transportation services. See MSM Chapter 1900 for additional information on Medicaid-covered travel services.

**Exam codes**

Use CPT codes 99381-99385 and 99391-99395 to bill for a comprehensive preventive medicine evaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of appropriate immunizations(s), laboratory/diagnostic procedures. Additional specifications are listed in the table below.

Use modifier EP or TS with the appropriate exam code in the table below.

- **Modifier EP** indicates a normal, routine screening.
- **Modifier TS** indicates that referral or follow-up services are recommended. When using modifier TS, complete Field 21 on the CMS-1500 claim form with the most current diagnosis code(s) that reflects the condition requiring follow up.
- **Modifier 25** must be used with other non-preventive medicine Evaluation & Management (E&M) services (e.g., codes 99212-99215) when reported in conjunction with vaccine administration when the E&M service is significant and separately identifiable. (See Web Announcement 565 for additional instructions for the use of modifiers 25 and EP with vaccine and vaccine administration codes.) Continue to use EP and TS modifiers as well.

**Non-covered services**

Medicaid does not cover a “sick kid” visit and a Healthy Kids exam for the same recipient on the same date of service. A Healthy Kids exam should be rescheduled if the child is too ill to complete the exam.

Services that are not medical in nature, including educational interventions, are not Medicaid covered benefits. Healthy Kids exams are not available to recipients who are Medicaid-eligible solely because of pregnancy.

**PA Requirements**

Healthy Kids exams and diagnostics do not require prior authorization.
Any service that is not covered under the recipient's benefit plan or that exceeds program limitations, but is recommended as a result of a Healthy Kids exam, must be prior authorized.

Services referred as a result of a Healthy Kids exam may require a PA as described in the applicable MSM chapter.

**PA requests must include** enough information to justify medical necessity. The requested service must be safe, effective and not considered experimental. All PA forms are available on the Nevada Medicaid website at [www.medicaid.nv.gov](http://www.medicaid.nv.gov). Some services may be requested online through the Provider Web Portal.

If you have prior authorization questions, please contact the Prior Authorization Department at (800) 525-2395.

**Referrals**

When services are referred as a result of a Healthy Kids exam, a written referral should be furnished to the recipient, the parent/guardian or the provider who will perform the referred service. Referrals should include:

- Recipient’s name
- Recipient ID
- Date
- Description of the abnormality
- Contact information for the recipient’s primary physician (if different from the screening provider)
- Name of the provider who is to perform the referred service (if known)
