Chapter 1. Getting started

The Nevada Medicaid and Nevada Check Up Health Care Online Provider Enrollment Portal allows providers, or their delegates, to enter all pertinent provider enrollment information using an online application. The online application captures key provider data such as contact information, provider type, specialties, and provider demographics such as names and locations.

The Online Provider Enrollment application allows you to navigate through each page of enrollment, from the contact information in the first page, to the final print preview and tracking number on the last page.
