Register Early for Access to the Provider Web Portal

Nevada Medicaid and Nevada Check Up providers are strongly encouraged to visit <http://www.medicaid.nv.gov> today and complete the Provider Web Portal registration process before December 5, 2011, which is the date HP Enterprise Services (HPES) becomes the fiscal agent.

By completing the registration process early, providers will be prepared to access the electronic verification, the online prior authorization and the pharmacy prior authorization systems without delays on December 5, 2011, and going forward.

Providers can register on and after December 5, 2011, but the online systems providers currently use will not be available after December 2, 2011.
