## **Urgent Pharmacy Announcement: Pricing Override Allowing Brand Products to Pay at Brand Price**

Nevada Medicaid and Nevada Check Up began using a NADAC based price effective November 1, 2015. See [Web Announcement 982](#). The Preferred Drug List (PDL) dictates the use of some brand products even though there is a generic available. Effective Friday, November 6, 2015, a pricing override was placed to allow certain brand products to pay at the brand price. Pharmacies may reverse and rebill these products to reflect the updated price. Any claims not reversed and rebilled by the pharmacy will be automatically reprocessed through a reverse and rebill process by Optum. The date of the reverse and rebill is yet to be determined, but will be within the coming weeks. Thank you for your cooperation.
