Announcement 1131

Outpatient Claims Affected by Edit Code 0210

Some outpatient claims, including crossover claims, have been denied in their entirety with edit code 0210 (Rate not on file) even when some lines on the claim were valid. Effective with claims processed on or after April 25, 2016, valid claim lines will process appropriately and only the invalid claim lines that are not covered will deny with edit code 0210.

Claims that denied inappropriately for edit code 0210 that had payable lines will be automatically reprocessed. A future web announcement will notify providers when the affected claims will be reprocessed.
