Policy Regarding Long Acting Reversible Contraceptives (LARC)

Nevada Medicaid provides family planning services to all eligible Medicaid recipients of either sex of child-bearing age. These services include the insertion of Long Acting Reversible Contraceptives (LARC). Medicaid Services Manual (MSM) Chapter 600, Section 603.3, Family Planning Services, page 8, states that "Insertion of Long Acting Reversible Contraceptives (LARC) immediately following delivery is a covered benefit for eligible recipients. LARC insertion is a covered benefit post discharge as medically necessary."
