FDA Approves HPV Vaccine

As of June 8, 2006, the Food and Drug Administration (FDA) approved the use of Gardasil, the first vaccine developed to prevent cervical cancer, precancerous genital lesions and genital warts due to human papillomavirus (HPV) types 6, 11, 16 and 18. The vaccine is approved for use in females 9 to 26 years of age. When billing Nevada Medicaid for administering Gardasil, please use procedure code 90649.
