Web Announcement 1714

Modernization: Provider Training on Modernized MMIS Scheduled for January 2019

The Division of Health Care Financing and Policy (DHCFP) will implement a new, modernized Medicaid Management Information System (MMIS) in early February 2019. Provider training on the modernized MMIS will occur in January 2019. Providers will have eight courses from which to choose to attend. Each four-hour training course will include details about the new system, as well as policy and enforcement changes customized to each broad provider type. It is imperative that providers receive training to prevent any delays in processing transactions such as enrollment/revalidation, claims and prior authorizations.

Below are the eight broad provider type training categories:

- Physician
- Long Term Care
- Behavioral Health
- Medical Outpatient
- Waivers
- Pharmacy
- Dental
- Hospitals

Access to register for training will start November 1, 2018, through the new [Modernization Project webpage](#) on the Nevada Medicaid website at www.medicaid.nv.gov. To open the new webpage, click on the "Modernization Project" link under "Featured Links" on the left-hand side of each page of the website. Once on the "Modernization Project" page, refer to the "Provider Training Opportunities" section which will include a link to a learning management system (LMS) site to self-enroll for training, instructions on how to register, and training workshop materials.

Below is a reminder of the dates of the training, so providers can mark their calendars.

January 7 – 18	January 22 – 25	January 28 – February 1
Instructor Led Training in Las Vegas	Instructor Led Training in Reno	Webinars for Remote Providers
