Reminder Regarding Role-Based Security for Delegate Users in the Provider Web Portal

Providers are reminded that the Provider Web Portal (PWP) uses role-based security for delegate users. Providers determine the level of access granted to their delegates by using role-based security when managing their account. Providers simply log into the PWP and from the My Home tab click on Manage Accounts to see all the delegates that are linked to their National Provider Identifier. Please refer to the "Granting access to a delegate" section in the Electronic Verification System (EVS) User Manual Chapter 1 for instructions.
