Coming Soon: Links on the Nevada Medicaid Website to OptumRx Electronic Pharmacy Prior Authorization Function

OptumRx, the Pharmacy Benefit Manager for Nevada Medicaid, is implementing a new system that enables prescribers to submit pharmacy prior authorization requests electronically. To assist prescribers with accessing the OptumRx ePA function, links will be posted on the Nevada Medicaid website that will take prescribers directly to the OptumRx ePA website.

The Pharmacy ePA link will be active and available in two locations:

- Under the "Pharmacy" tab on the non-secure Nevada Medicaid website.
- Under "Provider Services" on the secure Provider Web Portal.

A future web announcement will be published to provide additional details and to notify providers when the new links to the OptumRx pharmacy ePA are active on the Nevada Medicaid website.
