Web Announcement 2409

Attention All Providers: Non-Emergency Transportation is Available for Recipients to Receive the COVID Vaccine

Nevada Medicaid would like to remind all providers that Medicaid recipients who are eligible for Non-Emergency Transportation (NET) can schedule a ride to receive the COVID-19 vaccine. Because Nevada Medicaid understands how important it is for recipients to be vaccinated against COVID-19, the scheduling for this specific service will be expedited and recipients do not have to schedule a ride five days in advance because same day rides will be authorized, as possible. The following link is a flyer in English and Spanish with more detailed information about this special transportation option: [COVID-19 Vaccine NET Information Flyer](#).

Nevada Medicaid asks that all providers please share this important information with all of your NET eligible recipients.
