Web Announcement 240

Billing Guidelines for Essure Contraceptive System

The Essure Contraceptive System must be billed using CPT code 58565 for the procedure (Hysteroscopy, surgical; with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants) and HCPCS A9999 for the supply (Miscellaneous DME supply or accessory, not otherwise specified). These instructions apply to Provider Type 20 (Physician, M.D., Osteopath).

CPT 58565 does not require prior authorization (PA). HCPCS A9999 always requires a PA. The PA request must include a manufacturer's invoice for the Essure System.
