Web Announcement 2699

Attention Provider Types 12 (Hospital, Outpatient) and 43 (Laboratory, Pathology Clinical):

Laboratory Procedure Codes 81513 and 87563 Open for Billing

Laboratory procedure codes 81513 (Infectious disease bacterial vaginosis measurement RNA of bacteria in vaginal fluid specimen) and 87563 (Infectious agent detection by immunoassay technique mycoplasma genitalium) have been opened for billing by provider types (PTs) 12 (Hospital, Outpatient) and 43 (Laboratory, Pathology Clinical) on claims with dates of service on or after February 1, 2022. Prior authorization is not required. Claims will not be reprocessed as the update is a go-forward change for PTs 12 and 43.
