Web Announcement 2771

Use Modifier KX or Condition Code 45 for Claims for Transgender Individuals

Reminder to [Web Announcement 1305](#): Providers submitting claims for sex-specific services are reminded to use modifier KX (professional claim) or condition code 45 (institutional claim) when the claim is for a transgender individual. These designations will assist in the management and appropriate adjudication of claims for transgender individuals. This use of the modifier or condition code aligns with the Health and Human Services Office for Civil Rights (OCR) final rule, which is intended to promote non-discrimination against certain populations and protect their access to health coverage and health benefits.
