Web Announcement 2905

Attention Individual Servicing Providers Linked to a Group and Group Providers Billing with Individual Rendering Providers: Report Individual National Provider Identifier (NPI) as Rendering Provider on Claims

Individual servicing providers who are linked to a group and group providers billing with individual rendering providers are reminded that the individual's National Provider Identifier (NPI) must be reported in the rendering provider field on claims for services that are associated to the group. The individual NPI should not be reported as the billing provider if they are linked to a group, because the group is the billing provider in this situation. If the individual servicing provider's NPI is reported in the billing field, claims may be denied and/or money recouped from the group.
