## **Attention Provider Type 90 (Doula): Updates to Billing Requirements for Rural Members**

Effective August 25, 2025, provider type 90 (Doula) is no longer required to use Modifier TN on claims to indicate whether doula services were provided to a member in a rural area. Members will now be automatically assigned an indicator of Urban or Rural based on the zip code of their residential address.

This indicator will ensure that claims are billed and paid appropriately. The [PT 90 Billing Guide](#) has been updated to reflect this change.
