

**September 12, 2025**

**Nevada Medicaid Web Announcement 3721**

## **Attention Providers: New Nevada Medicaid Enrollment Requirements for Individuals Participating with Managed Care Entities**

Effective immediately, in order to participate with a Managed Care Entity (MCE), individual providers working under facilities or clinics who were previously exempt from enrolling with Nevada Medicaid due to linkage restrictions are now required to be screened by and enrolled with Nevada Medicaid as described in [42 CFR 438.602](#). These providers should submit an Initial or OPR enrollment application through Provider Flex by October 31, 2025, to continue providing services to Medicaid MCE members. Resources and training materials for the Provider Flex enrollment tool are available on the [Provider Flex](#) page.

**All** providers must be actively enrolled with Nevada Medicaid or have an application in process in order to be eligible for submission by the MCEs for credentialing with Nevada Medicaid's credentialing vendor Verisys.

See [Web Announcement 3567](#) and the [Medicaid Centralized Credentialing](#) page for more information about centralized credentialing.
