Nevada Medicaid Web Announcement 3725

Attention All Providers: Changes to Application Requirements in Provider Flex

Effective September 15, 2025, the following changes have been made for all application types in Provider Flex:

- Provider Flex users are now required to sign an attestation confirming that all information entered in the application is true and accurate before they can submit the application. Note: This attestation is separate from the signatures required in DocuSign for an initial enrollment application.
- The Drug Enforcement Administration (DEA) Number section has been removed from applications for all provider types (PT) except PT 28 (Pharmacy). The DEA Number is required for only PT 28.
