Nevada Medicaid Web Announcement 3865

**Attention Provider Type (PT) 19 (Nursing Facilities) and Hospitals under PTs 10, 11, 13, and 14:**

**Pre-Admission Screening and Resident Review (PASRR), Level of Care (LOC), and Nursing Facility Tracking (NFT) Requests Can Now Be Submitted Under One Profile**

Nevada Medicaid and Nevada Check Up providers can now create and submit a Pre-Admission Screening and Resident Review (PASRR), Level of Care (LOC) and Nursing Facility Tracking (NFT) request at the same time under one profile through the PASRR screening tool. The order of approval will not change: PASRR must be approved first, then LOC and NFT will be reviewed and determined.
