Free Continuing Education Credit Class for Nevada Dental Providers – Infection Prevention and Control (IPC) Guidance

The Centers for Disease Control and Prevention's (CDC) *Infection Prevention and Control Online Training, Foundations - Building the Safest Dental Visit*, offers a convenient, self-paced way for dentists, dental hygienists, and dental assistants to strengthen their infection control knowledge and practices. Designed with real-world dental settings in mind, this course reinforces the infection prevention and control (IPC) guidance and practical strategies to help ensure every patient visit is as safe as possible.

This IPC online training is free and may be completed at your own pace, or in as little as three hours in one sitting. Upon completion of the three training modules, participants can earn three (3) continuing education credits approved by the ADA's Continuing Education Recognition Program through a collaboration with the Association for Dental Safety and the CDC.

It's an easy, valuable opportunity to stay knowledgeable and continue delivering high-quality care to Nevadans.
