Nevada Medicaid Web Announcement 4017

Attention Provider Type 63 (Rehabilitative Residential Treatment Services): New Shadow Billing Requirements

Effective October 19, 2026, Nevada Medicaid will implement new shadow billing codes for provider type (PT) 63 (Rehabilitative Residential Treatment Services) specialty 963 (Psychiatric Residential Treatment Facilities). To allow providers time to implement these changes, shadow billing will not be enforced for this specialty until 2027. A future web announcement will be posted when more information is available, including when shadow billing becomes mandatory.

In addition to the Room & Board revenue codes, PT 63 specialty 963 providers will use encounter revenue code 0911 with at least one qualified CPT code included on the claim line as a shadow procedure code. Multiple details with different shadow billed codes may be submitted under revenue code 0911 to appropriately reflect the services rendered, but only one encounter will be paid per person per day.

A new supplemental document with a list of the approved codes that can be shadow billed will be available on the [Billing Information](#) webpage. The Provider Type 63 Billing Guide will also be updated to reflect shadow billing policy. No claims will be reprocessed automatically as this will be a go-forward update.
