Nevada Medicaid Web Announcement 4019

New Community Work Requirements for Certain Individuals

What is changing:

Beginning January 1, 2027, changes go into effect that impact the Medicaid eligibility process for some adults renewing or enrolling Medicaid coverage. This is due to the Working Families Tax Cut (WFTC) legislation, or HR1, which was signed into law in July 2025. Many adults, ages 19-64, will need to meet new community engagement requirements or qualify for an exception to be eligible for Medicaid coverage. Applicants must meet new requirements of 80 hours of work, school, or volunteering during one month before applying for or renewing Medicaid coverage.

Additionally, redetermination for Medicaid eligibility for some adults will occur once every 6 months, instead of every 12 months currently. This will begin after an individual's first renewal on or after January 1, 2027. Impacted members must comply with work requirements for each renewal.

More information about all policy changes can be found on the [HR1 section](#) of the Nevada Medicaid website.

What providers can do:

Providers will play an important role to support Nevada Medicaid members throughout the transition. There are a few steps that members should take now, that providers can support:

1. Confirm their first redetermination date in 2027. This is when new work requirements may apply, if the member is subject to these changes.
 - a. Providers may view a member's redetermination date through the Eligibility Information Verification section in the Provider Web Portal (PWP).
 - b. There are three ways that members can view their redetermination date directly; these are outlined on the [HR1 section](#) of the Nevada Medicaid website.
2. Make sure their contact information is up to date.
 - a. Providers can direct patients to view and update their contact information with the State through three methods outlined on the [HR1 section](#) of the Nevada Medicaid website.

Nevada Medicaid has developed a comprehensive [Partner Resources Toolkit](#), available now on our website. This includes flyers, social media templates, Frequently Asked Questions, and more. We encourage providers to utilize and distribute these resources in their offices, clinics, and facilities.

Thank you for your partnership to support Nevada Medicaid members in preparing for these changes.
