**Nevada Medicaid Web Announcement 4024**

## **Attention All Providers of Maternity Services: Nevada Medicaid and Unbundling Maternity Care Services Codes**

The American Medical Association (AMA)'s Editorial Panel has released updated maternity care service coding guidelines, with recommended adoption beginning January 1, 2027. These revisions separate service codes into four distinct phases of care: antepartum, labor management, delivery, and postpartum.

At this time, Nevada Medicaid, including Nevada Medicaid's managed care organizations (MCOs) will **not** adopt this new code structure on January 1, 2027.

Therefore, Nevada Medicaid providers should continue to use the current bundled code structure until Nevada Medicaid's policy is changed.

Nevada Medicaid is actively working toward development and deployment of this new reimbursement model in alignment with our ongoing commitment to enhance and improve maternity care and support appropriate provider reimbursement.

Additional information regarding Nevada Medicaid's timeline for adoption of the new reimbursement model, as well as other maternity care initiatives, will be communicated through future announcements and public notices anticipated to be released in mid-2027.
