Nevada Medicaid Web Announcement 4052

Attention Provider Type 19 (Nursing Facility Providers): Update Nursing Facility Quarterly Resident Roster Web Portal

Nevada Medicaid is updating how freestanding nursing facilities receive quarterly resident rosters to better serve providers and safeguard resident data. In collaboration with our contractor, Myers and Stauffer, we will begin distributing resident rosters via a secure web portal, similar to the web portal currently used for nursing facility cost reporting.

To initiate portal user set-up in the new MDS roster distribution portal, freestanding nursing facilities should email NVMDSRosters@MSLC.com to identify the employees that require access to the quarterly MDS rosters used for rate setting. Additional information will be provided to web portal users during the set-up process.

We will rely solely on distribution of resident rosters via the web portal starting in January 2027, so we encourage freestanding nursing facility providers to initiate user set-up as soon as possible. We look forward to another successful web portal implementation!
