Announcement 885

Claim Denials for Edit Code 0367 (Bill Medicare)

The Nevada Medicaid Management Information System (MMIS) has been updated with the current versions of CPT and HCPCS codes per the Centers for Medicare & Medicaid Services (CMS) to ensure claims do not receive edit code 0367 (Bill Medicare) for services that Medicare does not cover. These services, non-covered under Medicare, will now bypass this edit code (0367) to process under Medicaid. The service may or may not be a covered service under Medicaid and the adjudication will now correctly reflect the appropriate outcome.
